Crab Apples

All the crab apples we offer are large size, as large as a small sized apple.

TRANSCENDENT. Earlier than the above. Yellow striped with red. Very juicy.

WHITNEY. Large size. Green striped with red. Heavy bearer and especially valuable for cider making.

We recommend only the hardy, tested varieties listed below. "An apple a day keeps the Doctor away." PLANT MORE APPLE TREES.

Plums and Plum-Cherry Hybrids

We offer herewith, what we believe are the very best varieties of Plums and Hybrids originating from the Minnesota and South Dakota Fruit Breeding Stations, as well as some of the old standby's.

**Hansen Hybrids**

Plant Sapa, Opata, Oka and Tom Thumb for early fruit. Will bear first year after planted. Kahinta and Waneta are among the very best of the Hansen introductions and will repay your effort ten-fold in a few years.

**SAPA.** Ripens very early. Flesh red, skin blue or black when ripe. Heavy bearer.

**OPATA.** Same as Sapa but larger, with green flesh. Both these are excellent for canning.

**KAHINTA.** Full sister to the Waneta and Tawena plums. About the same as Waneta in size and color but free-stone. Skin thin, no acerbity. Flesh firm, yellow and sweet. Unlike the Waneta, this variety will not overbear but produces a good crop every year. We recommend this variety very highly.

**OKA CHERRY.** Closest to the real cherry and the best of all the Hansen introductions. Very large, red flesh, small pit. Dries on trees until ready to be picked.

- 4-5 ft. 85c each
  - $7.00 per 10.
- 2-3 ft. 50c each
  - $4.50 per 10.

**German Prune**

*(Zwetschgen)*

A large, long, oval variety very good for drying. Color dark purple, very agreeable flavor. Each 4-6 ft. 80c, per 10 $7.50.

**Minnesota Station**

And Other Varieties

**UNDERWOOD.** Earliest of the Minnesota plums. Fruit dark red, very small pit. Excellent flavor.

**RED WING.** Very large, red free-stone. Peels like a peach. Very good.

**RADISSON.** Very large red plum, even surpassing Underwood in flavor.

The above sorts are all hardy and will bear fruit 2nd or 3rd year after being planted. These varieties take the place of our shipped in California plums except that they are so much better in quality that there is no comparison.

**COMPASS.** Natural Sand Cherry cross originated accidentally at Springfield, Minn., many years ago. Still valuable in Northern regions where less hardy varieties do not thrive.

The Mendel Pear

We feel safe in recommending only one pear for this section, the hardy, blight-proof Mendel originated by the late Wm. Pfaender, Jr., of New Ulm Minn., and introduced several years ago. The original tree has not blighted once in over 25 years and young trees, even though inoculated, resisted the disease. Entirely hardy in the Northwest sections and Canadian points and is being listed and featured by leading nurserymen everywhere. Fruit is larger than the Bartlett and of A No. 1 quality. Very sweet, good flavor and juicy. No grit. Color, golden yellow when fully ripe.

Emil and Eva June Merscheia. Chinese Elm in Back
Chinese Elm

Ask for Special Circular on This Tree

The most remarkable, talked of tree of the Century. Hardy, very fast growing, disease free, adaptable to all soils and climatic conditions, it is likewise drouth proof and will thrive where other trees fail to live. In China, where it originated, it grows successfully in high altitudes along irrigation ditches and even at 4,500 feet attains a good height. The tree is similar to our American Elm but grows three to four times as fast, is more upright and graceful and makes an equally attractive tree whether planted on the street or boulevard or whether used for grove plantings, windbreaks or hedges. Can be trimmed to any height hedge wanted. We have probably one of the largest blocks of these trees in the Northwest, grown from seed here which was selected and handpicked from specially fine specimens. We offer a complete variety of grades from 1 yr. seedlings to two-inch caliber trees, 10 to 14 ft. high.
